

HIGH VOLTAGE PRACTICE

Provides students with the knowledge and skills to manage the high voltage generation and distribution installations found on modern ships and other offshore installations.

This includes the design, installation, construction, trouble shooting, maintenance, commission, and calibration of the HV propulsion machinery, ancillary machinery, and related systems in line with statutory and operational requirements.

The course covers planning operation and electrical maintenance functions during routine operations and maintenance cycles, managing and allocating the required procedures and resources to sustain the operation of the vessel, and planning and carrying out HV switching operations for repairs, including propulsion systems. It also includes liaisons and reporting to shipping, industry and statutory stakeholders.

WHO SHOULD PARTICIPATE?

Those with responsibility for managing the high voltage generation and distribution installations found on modern ships and other offshore installations.

COURSE ENTRY PREREQUISITE

Please note the following prerequisite is for entry onto the course and evidence must be provided upon enrolment:

- Shipboard Operations Engine Training or equivalent

CERTIFICATION

The following certificate will be issued by AMC to participants who successfully complete* the course:

- Marine High Voltage Practice

**100% attendance, full participation and completion of all exercises is required.*

COVID-19 VACCINATION

AMC Search (AMCS) is operating a COVID-Safe campus aligned with the protocols and procedures established by the University of Tasmania. The safety and wellbeing of staff, students and the broader community is an absolute priority for the University of Tasmania.

From 15th January 2022, anyone coming to any of our campuses, facilities or events will be required to be fully vaccinated or have a medical exemption. This includes: staff, students, residents in University accommodation, consultants, contractors, volunteers and visitors.
