Please note, it will take between 2-4 business days to provide your access to the online course if you have not studied previously with AMC Search, the Australian Maritime College or the University of Tasmania.

COURSE FEE INCLUDES

- Course notes and writing materials
- Morning and afternoon tea
- Complimentary WiFi access

COURSE DETAILS

The course includes:

- What is simulation and the importance of simulation training in the maritime industry
- Basic simulator design and types of simulators
- The scope of simulation training
- The simulator instructor
- Conceptualizing a simulator training program
- Effective interpersonal and communications skills
- Conducting a simulation exercise

Participants will achieve a conceptual understanding of the importance of maritime education and simulator training with a view of the human element in shipping and special working environment on board a ship. In addition, this could also assist in giving the prospective simulator instructors an understanding into the psychology of learning in order to design and conduct simulator-based training programs, including exercises and detailed briefing and debriefing.

The course requires participants to actually plan a program, set up exercises and conduct them in a manner in which the simulator is used to its maximum potential to enhance the professional development of seafarers. Also discussion on the use of simulation for assessment is included.
